1 3.14 PUBLIC SERVICES

PUBLIC SERVICES	Potentially Significant Impact	Less Than Significant with Mitigation	Less Than Significant Impact	No Impact
a) Would the Project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:				
Fire protection?				\boxtimes
Police Protection?				\boxtimes
Schools?				\boxtimes
Parks?				\boxtimes
Other public facilities?				\boxtimes

2 **3.14.1 Environmental Setting**

- 3 The current Project area consists of OHV recreational access trails that are designed to
- 4 accommodate the use and operation of OHVs. Directly adjacent to the Project area,
- 5 there are areas that accommodate OHV use, boats, camping and recreational vehicles
- 6 (e.g., fifth wheel travel trailer, travel trailer, truck camper, and folding pop-up tent trailer)
- 7 that contain hook-ups to electrical pedestals.
- 8 The County Fire Department provides fire protection services on a contract basis to
- 9 Needles and operates as the Needles Fire Department. The Needles Fire Department
- 10 currently serves the existing Park.
- 11 Police protection is provided by the County Sheriff's Department which also operates
- 12 the Sheriff's Water Safety Center located within the Park.

13 3.14.2 Regulatory Setting

16

- 14 The following Federal and State laws and regulations pertaining to this issue area and
- relevant to the Project are identified in Table 3.14-1.

Table 3.14-1. Laws, Regulations, and Policies (Public Services)

U.S.	Code of	Under 29 CFR 1910.38, whenever an Occupational Safety and Health
	Federal	Administration (OSHA) standard requires one, an employer must have an
	Regulations	Emergency Action Plan that must be in writing, kept in the workplace, and available to employees for review. An employer with 10 or fewer employees
		may communicate the plan orally to employees. Minimum elements of an
		emergency action plan are:
		 Procedures for reporting a fire or other emergency;
		 Procedures for emergency evacuation, including type of evacuation and

		exit route assignments; Procedures to be followed by employees who remain to operate critical plant operations before they evacuate; Procedures to account for all employees after evacuation; Procedures to account for all employees performing rescue or medical duties; and The name or job title of every employee who may be contacted by employees who need more information about the plan or an explanation of their duties under the plan. Under 29 CFR 1910.39, an employer must have a Fire Prevention Plan (FPP). A FPP must be in writing, be kept in the workplace, and be made available to employees for review; an employer with 10 or fewer employees may communicate the plan orally to employees. Minimum elements of a FPP are: A list of all major fire hazards, proper hazardous material handling and storage procedures, potential ignition sources and their control, and the type of fire protection equipment necessary to control each major hazard; Procedures to control accumulations of flammable and combustible waste materials; Procedures for regular maintenance of safeguards installed on heat-producing equipment to prevent the accidental ignition of combustible materials; The name or job title of employees responsible for maintaining equipment to prevent or control sources of ignition or fires; and The name or job title of employees responsible for the control of fuel source hazards. An employer must inform employees upon initial assignment to a job of the fire hazards to which they are exposed and must also review with each employee those parts of the FPP necessary for self-protection.
		to place and keep in proper working order fire safety equipment within facilities.
CA	California Code of Regulations	Under Title 19 , Public Safety , the California State Fire Marshal (CSFM) develops regulations relating to fire and life safety. These regulations have been prepared and adopted to establish minimum standards for the prevention of fire and for protection of life and property against fire, explosion, and panic. The CSFM also adopts and administers regulations and standards necessary under the California Health and Safety Code to protect life and property.

- The following goals and policies related to public services are from the San Bernardino County 2007 General Plan:
 - Chapter III. Circulation and Infrastructure Element Section D. Countywide goals and Policies of the Circulation and Infrastructure Element
 - This includes policies and goals for public services including telecommunications, fire protection, law enforcement, and other utilities.

3.14.3 Impact Analysis (CEQA)

a) Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in

16

- Fire Protection: Because the Project would not result in a significant increase in the number of Park visitors and no new major structures are proposed, there would be no increase in the demand for fire protection services.
 - Police Protection: Because the Project does not result in a significant increase in the number of Park visitors, there would be no increase in the demand for police protection services.
 - Schools: Because the Project would not generate a significant number of new permanent jobs or create housing, impacts on schools are negligible.
 - Parks: Because the Project would not generate a significant number of new permanent jobs or create housing, impacts on existing parks are negligible.
 - Other Public Facilities: Because the Project would not generate a significant number of new permanent jobs or create housing, impacts on existing parks are negligible.

17 3.14.4 Environmental Consequences (NEPA)

18 No Action Alternative

- 19 The No Action Alternative would have no impacts related to Public Services. The
- 20 Project would not be implemented and the Park would continue to be operated as a
- 21 regional Park with activities as boating, camping, and limited stay mobile housing within
- 22 the Park boundaries.

23 Proposed Action (Project)

- 24 The Project would not induce population growth and the construction of housing since
- 25 there are no plans to construct facilities that would encourage increased Park visitation
- 26 within the Project area.

27 Cumulative Impacts

- 28 The analysis area for potential cumulative impacts related to Public Services was
- 29 defined as the area within the Project area, the Park, and the adjacent areas of the
- 30 Park. No potential impacts are anticipated within the area of analysis and no cumulative
- 31 impacts are anticipated because the Project design would not include additional
- housing, facilities, and other structures that would induce population growth.

33 3.14.5 Mitigation Summary (CEQA Only)

- 34 The Project would not result in significant impacts to Public Services. Therefore, no
- 35 mitigation is required.
